Re: Accessibility of Electronic and Information Technology (EIT), Section 508

Section 508 of the Rehabilitation Act of 1973 establishes requirements for Electronic and Information Technology (EIT) to be accessible to people with disabilities. EIT includes computer hardware and software, operating systems, telephones, and other telecommunication products.

LECO is a manufacturer of analytical instrumentation for the fields of elemental analysis, mass spectrometry, and metallography. The majority of our applications utilize a computer to analyze, process, and store instrumentational data. These products are primarily designed and manufactured for specialized applications and are installed in those respective environments, such as laboratories, research centers, and universities. They are not marketed, nor are they intended, for the general public.

LECO's products fall under Federal Supply Group 66, Instruments & Laboratory Equipment and are outside the scope of Section 508 requirements, as shown on our General Services Administration contract.

Please feel free to contact us if you have any questions or need more information. All inquiries can be directed to raghu_murthy@lecotc.com.

Best regards,
